

Solution Architecture

Date	30 June 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Solution Architecture Diagram:

Component Description Table

Component	Description/Role in Architecture	Technologies Used
Presentation Layer	Bio + event input, generate/verify controls, starter + fact-check display	Streamlit

API Layer	Exposes /api/v1/generate, /api/v1/verify; orchestrates downstream calls	FastAPI
event_analyzer.py	Extracts key themes from event description	DistilBERT (zero-shot classification pipeline)
fact_checker.py	Formulates a query from extracted themes, retrieves a verified Wikipedia summary which runs before generation to ground it	Wikipedia Search & Lookup API
topic_generator.py	Produces context-aware conversation starters, prompted with themes + bio + the verified facts so output is fact-checked by construction	GPT-2 Small (Hugging Face text-generation pipeline)
Data Persistence	Logs full session (bio, event, themes, starters) and feedback	Local JSON files (history.json, feedback.json)
